The Sexagesimal System, Which Was Used In Babylonia.

Why is the hour divided into sixty minutes, each minute into sixty seconds, etc.? Simply and solely because, in Babylonia, there existed by the side of the decimal system of nations another system, the sexagesimal, which counted by sixties. Why that number should have been chosen is clear enough, but it speaks well for the practical sense of those ancient Babylonian merchants.

There is no number which has so lonians divided the sun's daily journey into twenty-four parasangs, or ney into twenty-four parasangs, or Oct. 22nd.

The bady tance so much alike that it was hard to distinguish one from another. Gen. Beauregard, after the battle of July 18, at Blackburn Ford, orwas subdivided into sixty minutes.

hour into Europe.

Ptolemy, who wrote about 150 A. D., whose name still lives in the Ptolemaic system of astronomy, gave still wider currency to the Babylonian way of reckoning time. He popularized it.

It was carried along on the quiet stream of traditional knowledge through the middle ages, and. strange to sav. it sailed down safely over the Niagara of the French rev olution, for the French, when revolutionizing weights, measures coins and dates and subjecting al to the decimal system of reckoning were induced by some unexplained motive to respect our clocks and watches and allow our dials to remain sexagesimal-that is, Baby-
